## PROFESSIONAL SUMMARY

Product Designer with 2 years of experience designing software for fintech, healthcare, on-demand service, and enterprise tools. Drawn to complex product problems and focused on turning them into experiences that feel obvious in hindsight. Experienced across the full design process, from early discovery and user flows through high-fidelity UI and developer handoff, and comfortable working closely with engineering and business teams to take designs from concept to shipped product.

## SKILLS & TECHNICAL TOOLS

**Skills:** Product Design · UX Research · UX Design · User Flows & Journey Mapping · Wireframing · High-Fidelity UI Design · Prototyping · Design Systems · Interaction Design · Visual Design · Mobile App Design · Web Design · Usability Testing · Frontend Fundamentals (HTML5, CSS3, Tailwind CSS)

**Tools:** Figma · FigJam · Sketch · Adobe XD · Adobe Illustrator · Canva · VS Code · GitHub · Slack · Google Workspace · Microsoft Office

## EXPERIENCE

**LEDGAFLOW -** Product Designer JAN 2026 – PRESENT

- Designed end-to-end finance software for freelancers, businesses, and accounting firms — reaching 3,500+ users and 250+ businesses processing 50,000+ transactions monthly within six months of launch.
- Designed complex financial workflows including invoicing, VAT computation, bill capture, approval routing, payroll, and bank reconciliation — making accounting logic feel simple for non-finance users.
- Designed role-based dashboards and access flows across all three products, giving each user type — Owner, Staff, Reviewer, Admin, Processor, Approver — a tailored, permission-specific experience.
- Built and maintained a design system ensuring consistency across three distinct products targeting different audiences.
- Worked closely with engineering to produce specs, interaction states, and edge case documentation for every feature shipped.

**BLUESENSE AI -** Product Designer NOV 2025 – FEB 2026

- Designed user experiences for Smart Beauty across iOS and Android, covering core flows including AI skin analysis, onboarding, personalised routine building, product discovery, and dermatologist consultation booking.
- Designed an internal dashboard for healthcare professionals to manage user profiles and skin analysis insights, with a focus on accessibility and data clarity.
- Created personalized AI recommendation flows from onboarding through to product discovery, using user journey mapping, information architecture, and interaction design to reduce friction at every step.
- Redesigned the app's navigation system to improve discoverability and reduce friction across key user journeys, and created the Smart Beauty logo in Adobe Illustrator.
- Designed the in-app shopping experience allowing users to browse and purchase dermatologist-recommended skincare products directly within the app, with ingredient breakdowns and concern-based filtering.

**NEXQUANTUM TECHNOLOGIES -** Product Designer AUG 2025 – NOV 2025

- Designed key features and flows for internal-facing enterprise software, working closely with engineering teams to produce interfaces that simplified complex operational workflows for internal users.

- Designed core user flows for a mood-based restaurant discovery app, translating an unconventional discovery concept into a clear, intuitive mobile experience.
- Designed a landing page for a book launch and developed brand identity and marketing assets for NexQuantum and a podcast client — covering visual identity and promotional materials across digital channels
- Collaborated with engineers and product stakeholders across multiple concurrent client projects, adapting design decisions to

**HNG -** Product Design (Internship) JUL 2024- AUG 2024

- Designed wireframes, high-fidelity mockups, and interactive prototypes in Figma for web and mobile applications.
- Worked on a healthcare dashboard designing data-heavy interfaces that presented patient and health metrics clearly for professional users.
- Designed a habit tracker app covering onboarding, daily tracking flows, progress visualisation, and reminder states across mobile screens
- Conducted user research, built personas, and mapped user journeys to inform design decisions across projects
- Collaborated with cross-functional teams of developers and product managers in a fast-paced, deadline-driven environment — iterating quickly based on feedback at each stage.

## PROJECTS

**SEAMFIX -** Asset Tracking Management System

- Led the end-to-end design of an enterprise asset tracking system across four user roles, delivering 110+ screens across 10 flows — including asset & user management, repaired & maintenance, audit monitoring, reporting, and session control

**SPROUT: SAVINGS & PERSONAL FINANCE**

- Designed and delivered the end-to-end experience for a personal savings app, covering goal-based savings, automated contributions, spending insights, progress tracking, and account management across multiple user flows.

**Project Link -** behance.net/victorelugbaju/groovia-grocery-app

**GROOVIA: GROCERY SHOPPING APP**

- Designed the experience for a grocery shopping app, covering product discovery, smart search and filtering, cart and checkout flows, order tracking, and personalized recommendations across multiple user journeys.
